

Wisconsin's no call list has made my evenings and weekend mornings much more peaceful. The companies that want this list weakened don't understand, we don't want the calls. Before the list, I just wouldn't pick up the phone due to there number being unavailable on caller ID, but I still had to run to the phone for nothing. The times I would pick up, there would be dead silence for a minute and sometimes would get no answer. If everything is about money, the list will be weakened. Please don't bow down to big business, keep the people happy for once.
